#### Announcement:

#### The Donald E. Knuth Scholarship for 1992

The intent of the Donald E. Knuth Scholarship is to encourage the increase of knowledge about T<sub>E</sub>X and to sharpen the T<sub>E</sub>X skills of non-technical users.

Owing to an administrative foulup, no Knuth Scholarship was awarded for 1991. The TUG Board and the Scholarship Committee regret this, and invite participation from eligible TUG members for next year.

One Knuth Scholarship will be awarded in 1992. The competition will be open to all 1992 TUG members holding support positions that are secretarial, clerical or editorial in nature, as determined by job title and duties, and not holding a degree with a major in a technical, scientific or mathematical subject area. The award will consist of an expense-paid trip to the TUG annual meeting and to the Scholar's choice from the short courses offered in conjunction with that meeting. A cap of \$2,000 has been set for the award; however, registration fees for the meeting and short course will be waived, and not counted in the limit.

To enter the competition, applicants should submit to the Scholarship Committee, by the deadline specified below, the input file and final T<sub>E</sub>X output of a project that displays originality, knowledge of T<sub>E</sub>X, and good T<sub>E</sub>Xnique. The project may make use of a macro package, either a public one such as L<sup>A</sup>T<sub>E</sub>X or one that has been developed locally; such a macro package should be identified clearly. Such fea-

tures as sophisticated use of math mode, of macros that require more than "filling in the blanks", or creation and use of new macros will be taken as illustrations of the applicant's knowledge.

All macros created by the candidate should be well documented with clear descriptions of how they should be used and an indication of how they work internally.

All associated style files, macro-package files, etc., should be supplied, or a clear indication given of any widely available ones used (including version numbers, dates, etc.); clear information should be provided concerning the version of T<sub>E</sub>X used and about any other software (e.g. particular printer drivers) required. Any nonstandard fonts should be identified and provided in the form of .t<sub>f</sub>m and .p<sub>k</sub> files suitable for use on a 300dpi laser printer.

While the quality of the typographic design will not be an important criterion of the judges, candidates are advised to ensure that their printed output adheres to sound typographic standards; the reasons for any unusual typographic features should be clearly explained.

The input files should be provided in electronic form as well as on paper. Suitable electronic media are IBM PC-compatible or Macintosh diskettes, or a file sent by electronic mail.

A brochure with additional information is available from the TUG office. To obtain a copy, or to request instructions on e-mail submission, write to the address at the end of this announcement, or send a message by e-mail to [TUG@Math.AMS.com](mailto:TUG@Math.AMS.com) with the subject "Knuth Scholarship request".

Along with the project, each applicant should submit a letter stating the following:

1. affirmation that he/she will be available to attend the 1992 annual meeting;
2. affirmation of willingness to participate on the committee to select the next Scholar.

Each applicant should also submit a *curriculum vitae* summarizing relevant personal information, including:

1. statement of job title, with a brief description of duties and responsibilities;
2. description of general post-secondary school education, T<sub>E</sub>X education, identifying courses attended, manuals studied, personal instruction from experienced T<sub>E</sub>X users, etc.;
3. description of T<sub>E</sub>X resources and support used by the candidate in the preparation of the project.

Neither the project nor the *curriculum vitae* should contain the applicant's name or identify the
